PROFILE

Front-end developer with three years building large enterprise applications in Angular and ExtJS at Serviceware, where I also lead the team's shift to AI-first development. On the side I am building a SaaS from scratch, infrastructure included. I care about work measured on real tickets, not demos, and about front-ends that stay fast and accessible.

EXPERIENCE

Front-end Developer · Serviceware, Palma (hybrid)

Mar 2023 – present

> Lead the team's move to AI-first development: adopted the company's agent platform for the Knowledge team and drive most of its evolution — role commands, MCP integration with Azure DevOps, and OpenSpec as the single store of behaviour every repository follows.

- Build and maintain the Serviceware Knowledge front-end: Angular widgets and applications in an NX monorepo with shared libraries; daily work on the main client, a very large ExtJS application.
- Built a Chrome and Edge browser extension in React that brings Knowledge into other tools.
- Own Azure DevOps for the front-end: repositories, branching, CI/CD pipelines and package flows, including migrations from Jenkins, Jira and GitHub.
- Automated tests with Playwright and Jest; code review and documentation across the front-end projects. Built the team's Claude Code plugin: agents, skills, two MCP servers, guard hooks. Internship Mar–Jun 2023, full-time since.

PROJECTS

Own SaaS for Spanish SMEs · founder & developer, in development

2026 – present

Multi-tenant invoicing platform around Spain's VeriFactu rules: NestJS, Prisma and PostgreSQL, React + Vite front-end, Keycloak, NX monorepo. Railway with per-PR environments, GitHub Actions gates, Sentry and Grafana. Agent-operated delivery: a tool gateway with RBAC and autonomy levels, a git-backed board delegated to a self-hosted agent organisation, Jev for triage.

Casal de Colònies · booking management for a summer camp

2025

Portable desktop app (Next.js + Electron, SQLite via sql.js, Gmail API) for a camp in Mallorca: bookings, occupancy, deadlines and PDF agreements from templates the client edits itself. Delivered end to end; in use.

SKILLS

Front-end	Angular, ExtJS, React, Next.js, Electron · TypeScript, JavaScript, HTML, CSS/SCSS
Back-end	NestJS, Prisma, PostgreSQL, Keycloak · Docker, Railway, GitHub Actions
Tooling	NX monorepo, Git, Azure DevOps, GitHub, CI/CD · Playwright, Jest, Vitest
AI	Agent orchestration, Claude Code, Codex, OpenCode, OpenRouter, MCP, OpenSpec

EDUCATION

2021 – 2023	Higher Vocational Diploma, Web Development CIFP Francesc de Borja Moll
2019 – 2021	Intermediate Vocational Diploma, Network & Systems Administration IES Capdepera · Erasmus placement in Cork, Ireland
2025	Google: Artificial Intelligence and Productivity Santander Open Academy
